WORK EXPERIENCE

Sisense   **May 2022 – Present**
Technical Solutions Engineer (L3)   *Denver, CO*
- Spearheaded troubleshooting efforts, offering leadership and guidance to address customers' technical issues, customizing solutions for challenges in dashboard design and datasource functionality.
- Applied expertise in Linux shell, RestAPI, and web application troubleshooting to rectify customer concerns.
- Proficiently utilized MongoDB and Python to enhance data management processes and develop robust solutions, contributing to seamless integration within a dynamic technical environment for customers.
- Partnered with the Research and Development (R&D) team to prioritize and implement application solutions, contributing to the enhancement of future product versions.
- Created comprehensive documentation and delivered coaching and training materials for the Analytics Subject Matter Expert (SME) program, fostering team knowledge and proficiency.
- Mentored two individuals in distinct roles, providing guidance and support to foster their professional development within the team.

DaS Ltd   **Mar 2020 – Present**
Managing Member   *Denver, CO*
- Established a successful consulting company focused on delivering tailored solutions to clients.
- Developed advanced dashboards in Grafana using PostgreSQL, SQL Server and OpenTSDB, serving the Oil & Gas and Tech industries.
- Leveraged consulting expertise to address complex challenges and drive business value for clients.

Whiting Petroleum   **Dec 2018 – Jan 2022**
SCADA Systems Analyst II   *Denver, CO*
- Integrated financial and operational department data using SQL and performed extrema analysis in Python, identifying and saving $8M in annual overcharges related to salt water removal.
- Created and maintained internal data pipelines for streaming daily and aggregate data, enhancing data accessibility and efficiency.
- Recognized for efficiency and high-quality work related to data streaming pipelines.
- Leveraged Grafana and PowerBI to create interactive dashboards that enhanced data accessibility and understanding for remote monitoring of oil well metrics, significantly improving operational efficiency.
- Standardized dashboards and optimized queries to support a key "Management by Exception" initiative, resulting in improved user acceptance and dashboard usage.
- Mentored a team of 3 teammates and 1 coworker in SQL and Python development and error handling.
- Presented at GrafanaConline 2020 about Whiting's unique use case of Grafana and methods to automate dashboard deployment.
